

Hydr. press brake type APHS PRO-MAX

Best
Quality

Rigidly welded, monoblock steel frame construction for minimum deflection under load. Downstroking bending beam with two cylinders made from high-quality forged steel and precisely honed for best precision. Ram travel fully supported in low friction fiber slideways and full electronic synchronisation with proportional valve technology assuring maximum bend accuracy and repeatability through constant monitoring and correction of beam parallelism by CNC system. Stroke-depth measurement through high-precision linear scales CNC-controlled backgauge on ball screw spindles with DC drive. Block-type European hydraulics and compactly-wired electrical box with ventilation. Full conformity with EU Machinery Directive for safety and certified CE marking

Hydr. press brake type APHS PRO-MAX

Best
Quality

(A) Backgauge system with X-axes:

- Travel on ballscrew spindles
- AC-motor driven
- Two micrometric stop-fingers with height and lateral adjustment
- Range : 750 mm
- Travel speed (max) : 330 mm/s
- Positioning precision : ± 0.03 mm

(B) Backgauge system with X-R axes:

- Travel on ballscrew spindles
- DC-motor driven
- Two micrometric stop-fingers with lateral adjustment

- Range:

X-axis : 750 mm
R-axis : 160 mm

- Travel speed (max)

X-axis : 350 mm/s
R-axis : 240 mm/s

- Positioning precision

X-axis : ± 0.03 mm
R-axis : ± 0.05 mm

(C) Extra backgauge axes:

X-R-Z1-Z2 axes

Examples of backgauges

Standard:

- CNC control ESA S675 with 21" screen
- European-style top tool holders with wedges
- Sectioned (gooseneck) punch and multi-vee die block (all tooling precisely ground)
- Operation console with double foot-switch
 - Linear front-arm guides
- Electrically-interlocked side and rear guards

Optional:

- Manual or power-driven (CNC) crowning tables
 - Top tool manual quick-release clamps
 - Hydraulic tool clamping systems
- Special tooling for customer applications:
 - Special-profile top and bottom tools
 - Single-vee dies with table adapters
- Front light guards or front laser protection for enhanced safety

CNC unit

Graphical control with full programming and machine control facilities in a user-friendly computer environment. Main features include:

Programmable multi-axis control.

- Y1-Y2 cylinder axes
- X1-X2-R1-R2-Z1-Z2 backgauge axes
- CNC crowning axis
- Modular expansion for additional axes
- High memory capacity for program steps and tooling data
 - High number of product and bend repeat possibility
- Direct graphical programming with automatic computation of all axis positions and bend sequence in full graphic simulation
 - Manual operation of all axes
 - Teach-in on all axes
 - Operator selectable languages
 - Integrated diagnostic software
 - Memory storage on USB flashdisk

VisiTouch 19

- VisiTouch 19, 2D graphic with 19" user-friendly HMI with intuitive programming, 3D visualisation and simulation of imported programs.
- VisiTouch 19 MX, full 3D programming, visualisation and simulation. Import of DXF, IGES, STEP and SAT-files. Automatic process with complex parts.
