★ ★ ★

TCI Cutting has a vast experience in the design and manufacturing of industrial high precision waterjet cutting machines, and are leading in the market. A compact design makes the machine extreme space saving. The machine uses an ultra-high water pressure, which gives you a unique cutting capability.

The flexible TCI waterjet cutting machines are capable of cutting all kinds of material, even material with painted surfaces. The machine makes a clear cut, and the surface of the material stays even and without cracks, which means that you avoid material loss.

Very profitable, both regarding small series and long repetitive series.

Type SM-C 3015 waterjet comes with various high-pressure pumps and various cutting heads depending on the job to be carried out and the material.

Type	Max. thickness	Max. load	Cutting heads	Positioning speed	Max. cutting speed	Max. tolerance	Repeatability precision	Dimension
	mm	kg/m <sup>2</sup>	Stk.	m/min.	m/min.	mm/m	mm/m	mm
SM-C 3015	200	790	1	85	20	± 0,05	± 0,025	3000x1500x200
